

Building on the foundation of our existing assets, we envision a transportation system that provides mobility, accessibility and connectivity for people, goods and services; is tailored to our diverse geographies, and supports and sustains planned land uses.

Goals – provide direction for where the County would like to go.

Objectives – provide a more detailed breakdown of goals with more specific ends the County desires to achieve.

Goal 1: Sustainable

Create a transportation system that mutually benefits the environment, the economy and the community.

Environmental Sustainability Objectives

Objective 1.1: Reduce energy consumption associated with transportation by

1.1.1 Providing for non-motorized travel (such as walking and biking).

1.1.2 Providing public transit and connections to public transit.

1.1.3 Encouraging the reduction of car trips through carpooling, vanpooling, rideshare, transportation demand management, , transit pass programs, and telecommuting.

1.1.4 Encouraging the use of alternative-fuel vehicles.

Objective 1.2: Reduce transportation-related greenhouse gas emissions to targeted levels.

Objective 1.3: Minimize the air and water quality impacts of transportation-related activities.

Additional objective about land use?

Economic Sustainability Objectives

Objective 1.4: Stabilize existing sources of transportation revenue while securing new, innovative, long-term sources of funding.

Objective 1.5: Pursue cost-effective transportation solutions that consider the future needs of all transportation users.

Social Sustainability Objectives

Objective 1.6: Provide equitable access to transportation options for all users.

Goal 2: Local Business and Jobs

Plan the transportation system to support a prosperous and adaptable economy and further the economic wellbeing of the County and its residents.

Objective 2.1: Prioritize transportation improvements in locations that meet the existing and future transportation needs of the County's urban and rural employment sectors.

Objective 2.2: Ensure efficient movement of people and goods.

2.2.1 Increase access to employment sites and services for all modes and users through connectivity and transportation choices.

2.2.2 Provide more options for commuting to work by enhancing the existing transportation system and providing for affordable, alternative modes of travel.

2.2.3 Improve freight movement operations.

Additional objective about land use?

Goal 3: Livable and Local

Customize transportation solutions to suit the local community.

Objective 3.1: Expand transportation choices for all users.

Objective 3.2: Facilitate access to daily needs and services

Objective 3.3: Create successful and enduring communities

Objective 3.4: Create a resilient transportation system that can adapt to evolving land use and fit the desired future, while meeting present needs.

Objective 3.5: Further access to recreational opportunities and public lands.

Goal 4: Health and Safety

Promote a transportation system that maintains and improves individual and community health, safety and security.

Objective 4.1: Provide for and encourage use of safe, non-motorized transportation options to support public health.

Objective 4.2: Optimize the transportation system's ability to facilitate emergency response services.

Objective 4.3: Ensure that the transportation system provides access to daily needs and services for all users.

Objective 4.4: Reduce overall crash frequency and severity for all modes of travel.

Objective 4.5: Reduce transportation-related air emissions to improve air quality.

Goal 5: Equity

Provide an equitable transportation system.

Objective 5.1: Provide travel choices.

5.1.1 Provide travel choices for all residents and workers, regardless of race, age, ability, income level and geographic location.

5.1.2: Provide travel choices that allow residents and workers to adapt to changing economic conditions.

Objective 5.2: Prioritize resources to address transportation needs of communities that have been historically underserved.

Objective 5.3: Provide opportunities for residents of all races, ages and income levels to participate in project outreach activities and decision making.

Goal 6: Fiscally Responsible

Maintain a fiscally responsible approach to protect and improve the existing transportation system and implement a cost-effective system to meet future needs.

Objective 6.1: Adequately repair and maintain existing transportation facilities and services.

Objective 6.2: Prioritize projects that improve the existing transportation system for all modes of travel.

Objective 6.3: Identify projects that improve operations and delay the need for more costly improvements.

Objective 6.4: Identify and protect right-of-way for future transportation facilities and services.

Objective 6.5: Support transportation projects that use public resources effectively and efficiently.

Objective 6.6: Identify diverse, stable, long-term sources of funding.
